

CHIRANTH GOWDA S

Computer Science Engineering Student | Software Development | AI/ML | Full-Stack Engineering

Bengaluru, Karnataka, India | chiranthgowdas13@gmail.com | 8660435979 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science Engineering student with a 9.11/10 CGPA and hands-on experience building AI/ML, full-stack, backend, and real-time applications. Strong foundation in Java, Python, C, JavaScript, SQL, Data Structures & Algorithms, OOP, DBMS, REST APIs, and Cloud Computing. Developed projects involving privacy-preserving synthetic healthcare data, AI-assisted GitHub analysis, event management, inventory management, and real-time crowd monitoring. Secured 4th place in a national-level hackathon, 3rd place in a state-level hackathon, and 6th rank in a coding competition. Demonstrated leadership through 2 years of Placement Coordinator volunteering, Student Ambassador responsibilities, and college representation for Perplexity AI.

EDUCATION

K.S. Institute of Technology (KSIT), Bengaluru

Jan 2023 – May 2027

B.E. in Computer Science and Engineering | Visvesvaraya Technological University (VTU)

CGPA: 9.13/10 | 7th Semester GPA: 9.13/10

Narayana Pre-University College, Bengaluru

2022 – 2023

Pre-University Course (PCMC) — 95%

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, HTML, CSS

Frameworks: React, Next.js, Node.js, Express.js, Flask, FastAPI, TypeScript, EJS

Databases: MySQL, MongoDB, SQLite, SQLAlchemy

AI/ML: Machine Learning, scikit-learn, CTGAN, Synthetic Data Generation, Differential Privacy, Federated Learning, LLM Applications

Data: Pandas, NumPy, Matplotlib, Data Preprocessing, Statistical Analysis, Model Evaluation

Tools & Cloud: Git, GitHub, Docker, Docker Compose, Cloud Computing, REST APIs, JWT

Core CS: Data Structures & Algorithms, OOP, DBMS, Software Architecture, Authentication & Authorization

PROJECTS

GitInsight AI — AI-Assisted GitHub Engineering Evaluator

Python | FastAPI | Next.js | TypeScript | LLMs | Docker | SQLAlchemy

- Built an AI-assisted platform that analyzes public GitHub repositories and generates developer engineering assessment reports.
- Implemented backend services using FastAPI, Clean Architecture, SQLAlchemy, Pydantic, service/repository layers, and background workers.
- Developed repository analysis covering code quality, security, testing, documentation, DevOps, and engineering practices.
- Built a Next.js dashboard for engineering scores, skill analysis, repository health, strengths, weaknesses, and recommendations.
- Containerized the multi-service application using Docker and Docker Compose.

MediSynth AI — Privacy-Preserving Healthcare Data Generator

Python | Flask | CTGAN | scikit-learn | Differential Privacy | Federated Learning

- Developed a synthetic healthcare data platform combining CTGAN-based generation with Differential Privacy.
- Evaluated synthetic data using statistical validation, correlation analysis, mean/variance comparison, and ML utility testing.
- Implemented Train-on-Synthetic-Test-on-Real (TSTR) evaluation using accuracy, F1-score, and ROC-AUC.
- Added privacy-risk evaluation and simulated multi-hospital collaboration using Federated Learning and FedAvg.
- Secured 4th place at a national-level hackathon with this project.

EventSphere — Full-Stack College Event Management Platform

Node.js | Express.js | EJS | MySQL | Bootstrap

- Led development of a full-stack event management platform supporting student and organizer workflows.
- Implemented authentication, event creation, team registration, event-slot management, and registration workflows.
- Developed backend routes, MySQL database integration, responsive EJS interfaces, and organizer functionality.

Real-Time Crowd Density Tracker

JavaScript | Node.js | Express.js | Socket.IO | SQLite | Leaflet

- Built a real-time crowd monitoring system using browser geolocation and Socket.IO for live location updates.
- Implemented Haversine-distance calculations, configurable monitoring regions, density/risk levels, and an admin dashboard.
- Added JWT authentication, bcrypt password hashing, SQLite persistence, session management, and automated tests.

LEADERSHIP & ACHIEVEMENTS

- Placement Coordinator Volunteer, K.S. Institute of Technology — 2 years; coordinated placement communication, recruitment schedules, eligibility information, and student support.
- Student Ambassador, K.S. Institute of Technology — selected to support student engagement, outreach, and institutional initiatives.
- College Representative, Perplexity AI — represented the affiliate/referral initiative and promoted awareness among students.
- 4th Place — National-Level Hackathon, MediSynth AI.
- 3rd Place — State-Level Hackathon, Dayananda Sagar College of Engineering.
- 6th Rank — BYTE-SHIFT Coding Competition; Top 10 participant.
- Participated in multiple Smart India Hackathon (SIH) activities.

CERTIFICATIONS

- Innovation Ambassador (IA) – Advanced Level — MoE Innovation Cell & AICTE, IIC (2025–26)
- Artificial Intelligence Fundamentals — IBM SkillsBuild
- Introduction to HTML5 — University of Michigan / Coursera
- Data Structures in C — Great Learning Academy
- C Programming Course — Infosys Springboard

ADDITIONAL INFORMATION

Areas of Interest: AI/ML, Software Engineering, Full-Stack Development, Cloud Computing, Data Engineering, Data Analytics, DevOps, Research & Development

Languages: English, Kannada, Hindi; Japanese (Currently Learning)
